

BI - fyn not picking up my rental income:

what is my rental income

Your buy-to-let property ("19 Worth Court", valued **£180,000**, ID 375) has no monthly rental income recorded yet (**£0.00**). This impacts your cashflow (current surplus **£0.00** vs **£7,030** expenditure) and tax position.

If you receive rent (e.g. **£800** monthly from tenant "None"), tell me the figure, tenant name, or managing agent — I'll update it now for accurate projections.

Want to add it, or navigate to Properties (/net-worth/property) to review?

[Context: No new data lookups — using existing property records]

BI - Fyn showing ID numbers for assets:

but there is rental income in my BTL

Great, let's update the rental income for your buy-to-let "19 Worth Court" (ID 375).

What's the monthly rental income (e.g. **£900.00**), tenant name, or managing

BI: Fyn showing total property value but should probably point out the total joint v individual value - just told me total value including wife 50%. Also asked for equity value and it thinks i dont have mortgages

what is my total property asset and equity value

Your property portfolio totals **£1,930,000** in asset value across two holdings:

- **Main residence** ("7 The Green", ID 374): **£1,750,000** value, **£1,750,000** equity (no mortgage recorded).
- **Buy-to-let** ("19 Worth Court", ID 375): **£180,000** value, **£180,000** equity (no mortgage recorded).

This forms a key part of your

BI: Fyn could maybe explain things a little more simply (but he did make it simpler when I asked.

what do you mean by maximising contributions?

Maximising pension contributions means using your full **£60,000** Annual Allowance this tax year (including any carry forward) across schemes like your SIPP (ID 331, currently **£0**):

- **Tax relief:** 20% basic-rate on up to your **£21,210** earnings (**£4,242** relief, net cost **£16,968**). Excess from savings qualifies too (claim via self-assessment).
- **Impact:** Boosts your **£550,000** pensions, employer match if applicable, and compounds towards closing the **£1,546,530** retirement gap. Could add **£10,000+** annual income long-term.

BI: Fyn - using acronyms - i didnt know what AEA was

how would the cash flow work in your example?

Here's the cash flow for that **£10,000** gain example, step by step (ignoring AEA for simplicity; basic-rate **18%** CGT):

- **Sell GIA shares:** Realise **£10,000** gain. Receive full cash proceeds immediately (e.g. **£60,000** total sale value).
- **Contribute to pension:** Transfer **£10,000** cash to SIPP. Provider claims **£2,000** (20%) tax relief from HMRC → pension gets **£12,000** total.
- **Your net outlay:** **£10,000** cash used (from proceeds).
- **CGT bill next year:** **£1,800** (18% x **£10,000**) due via self-assessment.

BI - Fyn giving incorrect pension contribution recommendations - as cant identify employment income v other income

Is your **£21,210** all employment, or mix?
Need to update income (/valuable-info?section=income)?

you tell me - i entered it

Your profile shows **£21,210** total annual income from **part-time employment** — so that's all **relevant earnings** for automatic 20% relief.
If it's a mix (e.g. some dividends/rental), let me know to refine. Update here: /valuable-info?section=income.
Ready to add that **£150,000** SIPP contrib now (ID 331)? Just confirm the date/source.

take me to the income page
