

v0.6.2 Fixes Summary

BUG-001: Investment Dashboard Strategy Card Not Showing

Strategy card wasn't displaying for users without holdings or risk profile. Added recommendations that trigger without holdings data to ensure card always appears.

UI-001: Remove Strategy Count Badge from Strategy Card

Removed redundant "4 strategies" badge from Investment dashboard. Cleaner UI with just the "Strategies" title.

BUG-002: Preview Personas young_saver and retired_couple Return 400 Error

New personas returned 400 error because PreviewController wasn't uploaded to production. Added missing personas to VALID_PERSONAS constant.

DATA-001: Preview Personas Missing Health Data, Beneficiaries, and Proper Expenses

Preview personas lacked health status, smoking status, and beneficiary data. Updated all persona JSON files with complete health and beneficiary information.

UI-002: Beneficiaries Tab Showing on Non-Life Insurance Policies

Beneficiaries tab appeared on critical illness and income protection policies. Restricted tab to life insurance policies only.

DATA-002: Preview Personas Missing Education Level

Education level field was missing from preview persona data. Added education_level to all persona JSON files.

BUG-003: Risk Tab Detail View Back Button Goes to Investments Instead of Risk Dashboard

Back button in risk detail navigated to wrong page. Fixed navigation to return to Risk dashboard.

DATA-003: Alex Morgan (young_saver) Missing Health Data and Expenses

Young saver persona had incomplete profile data. Added health status, expenses, and other missing fields.

BUG-004: Retirement Navigation - Missing Back Buttons and Sidebar Reset

Retirement module had inconsistent navigation and sidebar state issues. Added back buttons and fixed sidebar reset on navigation.

BUG-005: Retirement Detail Tabs Not Scrolling to Top

Switching tabs in retirement detail didn't scroll to top. Added scroll-to-top behaviour on tab change.

BUG-006: Remove Orange Retirement Line from Monte Carlo Chart

Orange line on Monte Carlo chart was confusing users. Removed the line for clearer visualisation.

BUG-007: Onboarding Welcome Page Text and Styling Updates

Welcome page text needed refinement and styling improvements. Updated copy and applied consistent styling.

BUG-008: Date of Birth Validation Missing Across Application

Date of birth fields lacked proper validation. Added validation rules across all DOB input fields.

UI-003: Replace "Recommendations" with "Strategies" in Onboarding

Terminology inconsistency between "recommendations" and "strategies". Standardised to "Strategies" throughout onboarding.

UI-004: Update Country Dropdown in Domicile Information

Country dropdown needed updating for domicile section. Updated dropdown options and default selection.

UI-005: Update Domicile Information to Handle UK Constituent Countries

Domicile form didn't properly handle England, Scotland, Wales, NI. Added UK constituent country selection logic.

UI-006: Domicile Data Not Being Seeded for Preview Personas

Preview personas missing domicile information. Added domicile fields to persona seeder.

UI-007: Update Retirement Info Message in Onboarding Assets Step

Retirement info message in onboarding was unclear. Updated copy to be more helpful and accurate.

UI-008: Update Property and Cash Tab Info Messages in Onboarding

Property and cash tab messages needed improvement. Updated info messages for clarity.

UI-009: Update Investment Tab Info Message in Onboarding

Investment tab info message was outdated. Refreshed copy to match current functionality.

UI-010: Change Mortgage "Maturity Date" Label to "End Date"

"Maturity Date" label was confusing for users. Changed to "End Date" for clarity.

UI-011: Update Liabilities and Protection Info Messages in Onboarding

Liabilities and protection messages needed updates. Improved copy for better user guidance.

UI-012: Change Expenditure Note Box to Green

Expenditure note box was using wrong colour. Changed to green for consistency with other info boxes.

UI-013: Change Will Information Important Box to Green

Will information box colour was inconsistent. Updated to green to match design system.

UI-014: Hide Complete Setup Button for Preview Users

Complete setup button appeared for preview users inappropriately. Hidden button when in preview mode.

UI-015: Remove Add Data Dropdown from Navigation

Add Data dropdown in navigation was redundant. Removed for cleaner navigation.

BUG-009: Family Member Form Hangs on Validation Error

Family member form became unresponsive on validation errors. Fixed form state handling on validation failure.

BUG-010: Child Date of Birth Validation Inverted

Child DOB validation logic was backwards. Corrected validation to allow valid dates.

UI-016: Change 2FA Reminder Elements to Solid Green

2FA reminder styling was inconsistent. Updated to solid green for visibility.

UI-017: Improve Login Error Message with Registration Link

Login error message didn't help unregistered users. Added link to registration page in error message.

BUG-011: Property/Mortgage Display Issues

Property and mortgage values displaying incorrectly. Fixed calculation and display logic.

BUG-012: CRITICAL - User Data Leakage Between Sessions

User data from previous sessions could leak to new users. Implemented proper session isolation and clearing.

BUG-013: Expenditure Form Property Expenses Using Wrong Ownership Percentage

Property expenses calculated with wrong ownership share. Fixed to use correct ownership percentage.

UI-018: Display Mortgage Ownership Percentage When Different From Property

Mortgage ownership wasn't shown when different from property ownership. Added display of mortgage-specific ownership percentage.

BUG-014: Mortgage Ownership Not Saved - Wrong Values in Detail and Expenditure Views

Mortgage ownership percentage not persisting correctly. Fixed save logic and display in detail views.

BUG-015: Estate Planning Module Showing 100% of Joint Mortgages

Joint mortgages showing full value instead of user's share. Fixed to display ownership-adjusted values.

BUG-006: Joint Ownership Not Using Correct Percentage in Balance Sheet and Estate Planning

Joint assets using wrong percentage in calculations. Fixed ownership percentage handling across modules.

UI-001: Remove Taxes Tab from Property Detail Views

Taxes tab in property detail was unnecessary. Removed tab for cleaner interface.

UI-002: Add Blue Note for Shared Ownership Costs

Shared ownership costs lacked explanation. Added blue info note explaining cost sharing.

UI-003: Add Required Field Indicators to Property Form

Required fields not clearly marked on property form. Added asterisk indicators for required fields.

BUG-007: 2FA Prompts Not Disappearing After Enabling MFA

2FA setup prompts persisted after MFA was enabled. Fixed prompt visibility logic.

BUG-008: Investment Account Shows "Unnamed Account" on Dashboard

Investment accounts without names showed "Unnamed Account". Fixed to use provider name as fallback.

BUG-009: Tax Treatment Section Empty in Investment Detail View

Tax treatment section showed nothing for some accounts. Fixed data loading for tax treatment display.

UI-004: Tax Treatment Cards Have Black Border and Pastel Colors

Tax treatment card styling was inconsistent. Updated to match design system colours.

UI-005: Investment Account Form - NS&I Auto-Population and ISA Ownership

NS&I accounts needed auto-population and ISA ownership fixes. Implemented auto-fill and corrected ownership logic.

UI-007: Cash Dashboard Empty State Add Account Buttons

Empty state on cash dashboard lacked action buttons. Added "Add Account" buttons to empty state.

UI-008: Remove Goals Card from Cash Dashboard

Goals card on cash dashboard was redundant. Removed card for cleaner layout.

UI-009: Change Beta Version Message to Green

Beta version message colour was inconsistent. Changed to green for consistency.

BUG-014: Monte Carlo Charts Starting at Wrong Values and Year

Monte Carlo simulation started from incorrect baseline. Fixed starting values and year calculation.

BUG-015: Risk Badge Showing When No Risk Profile Set

Risk badge appeared even without a risk profile. Hidden badge when no profile exists.

BUG-016: Investment Detail Cards Show Empty State Instead of Prompts

Investment cards showed blank state instead of helpful prompts. Added appropriate prompt messages.

BUG-017: Retirement Strategies Section Not Showing

Retirement strategies section was hidden incorrectly. Fixed visibility logic for strategies.

BUG-018: IHT Calculation Table Collapsible Projection Columns

IHT table columns weren't collapsible on mobile. Added responsive collapse functionality.

BUG-019: Junior ISA Beneficiary Selection and NS&I Form Improvements

Junior ISA beneficiary selection had issues, NS&I form needed work. Fixed beneficiary logic and improved NS&I form.

BUG-020: Cash Dashboard - Real User View with Open Banking Promo

Cash dashboard needed Open Banking promotion for real users. Added promo section for non-preview users.

FEATURE-001: Password Reset Functionality

Application lacked password reset capability. Implemented full password reset flow with email verification.

BUG-007: Postcode Lookup Returning 404 Errors

Postcode lookup API calls returning 404. Fixed API endpoint routing and configuration.

BUG-008: Pension Projections Ignoring Percentage-Based Contributions

Pension projections used flat amounts instead of salary percentages. Fixed to calculate contributions from salary percentage.

BUG-009: Preview Mode Security Flaw - Session Not Cleared

Previous user session data leaked into preview mode. Added session clearing on preview login.

UI-001: Remove Diversification Tab from Pension Detail View

Diversification tab on pension detail was unnecessary. Removed tab, keeping Overview, Projections, Documents.

BUG-010: Compound Projection Growth Rate Using 500% Instead of 5%

Compound projection used percentage as decimal (5 instead of 0.05). Fixed growth rate calculation to divide by 100.

UI-019: ExpenditureForm Household Total Not Summing User and Spouse

Household total only showed user's expenditure for married couples. Fixed to always sum user + spouse expenditure.

DATA-004: Persona Data Fixes - Realistic Disposable Income and 50/50 Expenditure Split

All personas showed monthly deficits, unrealistic for demos. Fixed 50/50 expenditure split and adjusted incomes/expenses for positive disposable income.

BUG-011: Login Blocked by PreviewWriteInterceptor Middleware

Login failed when user had stale preview token in localStorage. Added api/auth/login to PreviewWriteInterceptor excluded routes.

23 January 2026

BUG-012: Cash Dashboard Not Displaying Accounts for Real Users

Real users' savings/current accounts were created in the database but never displayed in the UI. Fixed data loading to show accounts for non-preview users.

BUG-013: "Enter Holdings" Links Not Working in Investment Detail View

"Enter Holdings" links in Diversification and Rebalancing cards did nothing when clicked. Added missing event listener and HoldingForm auto-selects the current account.

BUG-014: Detail View Monte Carlo Chart Inconsistent with Dashboard

Monte Carlo chart in detail view used different probability bands and colours than dashboard. Fixed to match dashboard (4 bands: 95%, 90%, 85%, 80% with blue-to-green colours).

BUG-015: Account Strategy Card Position Inconsistent with Dashboard

Account Strategy Card was in left sidebar instead of full-width below chart. Moved to full-width position matching the dashboard pattern.

BUG-016: IHT Calculation Table Gap and -£0 Liability Values

Table had hardcoded colspan causing gaps and floating -£0 values in liabilities. Fixed dynamic colspan, added formatLiability method, corrected v-if conditions.

FEATURE-001: IHT Table Concertina/Accordion

Added collapsible groupings to IHT tables so multi-item asset/liability types collapse under summary headings. Sections start collapsed by default, reducing table clutter.

FEATURE-002: IHT Table Section-Level Concertina

Added outer section-level concertina ("User's Assets", "Spouse's Liabilities", etc.). Section headers collapse to show subtotals, giving users three levels of detail.

FEATURE-003: IHT Ownership Labels (Tenancy in Common and Mortgage Percentages)

Enhanced ownership labels in IHT tables. Tenancy in Common assets show percentage, joint mortgages show actual split when not 50/50.

FEATURE-004: Rename "Chattels" to "Personal Valuables"

All user-facing instances of "Chattel/Chattels" renamed to "Personal Valuable/Personal Valuables". Internal code unchanged.

BUG-017: Platform Fee Fields Not Persisting to Database

Platform fee values did not persist when adding/editing investment accounts. Added missing fields to backend validation rules.

BUG-018: Platform Fee Value Lost When Toggling %/£ Type

Entering a platform fee value then changing between % and £ caused the value to disappear. Fixed value transfer between fee type fields on toggle.

BUG-019: Fixed (£) Platform Fees Not Displayed in Fee Cards or Calculations

Fixed platform fees showed 0.00% in fee cards and were ignored in projections. Updated all fee display and calculation logic to handle fixed fees.

BUG-020: Detail View Navigates Away After Editing Account and Fee Card Not Refreshing

Editing an account navigated back to dashboard, and fee card didn't refresh. Fixed to stay on detail view and reload data after update.

BUG-021: Backend FeeAnalyzer Not Calculating Fixed (£) Platform Fees for Recommendations

Fixed fees above 0.8% threshold did not trigger "Review Platform Fees" recommendation. Updated FeeAnalyzer to convert fixed fees to percentage equivalent for comparison.

BUG-018: Inconsistent Form Button Scroll Behaviour

Form modals had inconsistent scroll behaviour — some sticky footers, some clipped buttons. Standardised all 16 forms to max-h-[90vh] overflow-y-auto with buttons inside scroll container.

BUG-019: Onboarding Personal Information Validation

Clicking Continue without entering data showed vague error with no field indication. Added red asterisks on required fields and specific inline error messages.

FEATURE-002: Onboarding Employment & Income Redesign

Employment & Income step showed all fields regardless of status. Redesigned to be context-aware — fields and income sources now dynamic per employment status.

BUG-020: Onboarding Asset Cards Open Add Form Instead of Edit Form

Clicking existing pension/savings cards opened Add form instead of Edit form. Fixed by deriving edit mode from data prop presence (matching working AccountForm pattern).

BUG-021: Health & Lifestyle Fields Block Onboarding Step Progress

Empty Health & Lifestyle dropdowns failed MySQL enum validation, blocking progress. Backend now only includes these fields when a valid value is selected.

FEATURE-003: Property Form Ownership Split Notes

Users entering joint property costs had no guidance on whether to enter full or shared amounts. Added contextual info messages for Costs and BTL tabs explaining 100% entry with split method.

BUG-022: Rental Income Not Applying Ownership Percentage for Joint/TiC Properties

Rental income showed 100% regardless of ownership type. Fixed backend and frontend to apply ownership percentage for joint/tenants-in-common.

FEATURE-004: Consistent Button Styling Across Forms

Button styling inconsistent between property, savings, and investment forms. Standardised: blue submit buttons, green mortgage checkbox, right-aligned with Cancel/Submit order.

FEATURE-005: Remove NI Number and Annual Income from Family Member Form

NI Number and Annual Income fields were unnecessary at family member level. Removed from template, data, and submit logic.

BUG-023: Dashboard State Pension Showing for All Users Without Pension Data

State Pension line (£11,500/yr default) showed for all users regardless of pension data. Now only shows when user has entered at least one pension (DC, DB, or state).

FEATURE-006: Remove Regular Savings from Expenses Form

Regular Savings input in Other Expenses was duplicating data captured in Savings module. Removed from both user and spouse forms, excluded from monthly totals.

FEATURE-007: Savings Account Access Type Auto-Selection

Selecting Notice Account or Fixed Term product type required manual access type selection. Access type now auto-sets to match the product type.

FEATURE-008: Onboarding Property Address Auto-Population

Users had to re-enter address when adding Main Residence during onboarding. Address fields now auto-populate from Personal Details when Main Residence is selected.

BUG-024: Investment Account Ownership Fields Not Persisting on Update

Changing ownership type on an investment account didn't save. Added `ownership_type`, `ownership_percentage`, `joint_owner_id` to `updateAccount` validation rules.

BUG-025: Savings Account Ownership Fields Not Persisting on Update

Same issue as BUG-024 but for savings accounts. Added ownership fields to `UpdateSavingsAccountRequest` validation rules.

FEATURE-009: Spouse Account Non-Editable in Family Section

Spouse accounts could be edited/deleted from primary user's account. Removed edit/delete buttons for spouse members, added info message about linked account access.

24 January 2026

FEATURE-010: BTL Management Agent Tab & Fee Integration

BTL properties had no way to show managing agent details or include agent fee in cost calculations. Added Management Agent tab with agent info, integrated fee into net rental yield and Expenditure tab.

CLEANUP-001: Remove Dead PropertyDetail.vue Component

`PropertyDetail.vue` was a standalone route component never navigated to — app uses `PropertyDetailInline.vue`. Deleted component and removed unused `/property/:id` route.

BUG-026: Expenditure Property Costs Not Individually Itemised

Property costs in Expenditure were grouped (utilities, insurance) and missing management agent fee. Split into individual items (gas, electricity, water, building insurance, contents insurance, management agent).

BUG-027: Spouse Expenditure Using Wrong Ownership Percentage for Joint Properties

Spouse Expenditure tab applied primary owner's percentage to both users for joint/TiC properties. Fixed to invert percentage for the joint owner (e.g. 70/30 split now shows 30% for spouse).

BUG-028: Spouse Expenditure Tab Missing Individual Cost Breakdown Items

Spouse tab only showed mortgage and council tax despite correct totals. Updated spouse template to use new individual breakdown keys matching user tab.

BUG-029: Mortgage Tab Co-Owner Dropdown Not Defaulting from Ownership Tab

Mortgage tab co-owner dropdown was empty despite ownership tab having a co-owner selected. Fixed watchers to sync `mortgageJointOwnerSelection` when ownership tab values change.

FEATURE-011: Management Agent Tab Visibility and Tab Order

Management Agent tab was always visible and positioned after Financials. Moved between Mortgage and Financials; hidden when no agent data exists.

BUG-030: Financials Tab Management Agent Fee Hidden When No Fee Set

Management Agent Fee field was hidden when no fee entered, leaving no reminder for BTL users. Changed to always show for BTL properties with "Not set" placeholder when empty.

BUG-031: BTL Rental Income Analysis — Net Income & Section 24 Tax Credit

BTL Financials mixed full property and share figures, had no Section 24 tax credit calculation. Restructured into cash flow breakdown + tax position box with Section 24 credit. Added interest portion field, per-property rental breakdown in Tax & NI card, and Learning Centre guide.

BUG-032: Dead Code Removal — Unused Questionnaire-Based Risk Profiling System

Questionnaire-based risk profiling (System 3) was never connected to any UI. Removed controller, 3 service classes, 6 API routes, and 5 dead frontend methods.

BUG-033: Capacity for Loss — Rework Thresholds & Detail View

Capacity for Loss used only 3 threshold levels with no actual calculation values shown. Updated to 4 levels (HIGH/MEDIUM/MEDIUM-LOW/LOW), detail view shows formula with £ values, spectrum updated to 4 zones.

BUG-034: Risk Factor Detail Views — Concise With Source Data

Risk factor detail views were verbose with generic cards and no actual data shown. Each factor now shows concise formula/source values, compact thresholds with "You are here" highlight.

BUG-035: Goals Module — Modal Buttons Unclickable (CSS z-stacking)

All goal modal buttons unclickable due to backdrop overlay intercepting click events. Added `relative z-10` to modal panels, changed submit to `type="submit"`, added validation messages.

BUG-036: Goals Module — "On Track" Shown With 0% Progress

Goals with no contributions showed green "On track" status due to tolerance margin edge case. Backend returns false when `current_amount <= 0`. Frontend adds gray "Not started" state.

BUG-037: Goals Module — Production 500 Error on Goal Creation

Goal creation returned 500 despite goal being persisted — stale `BaseAgent.php` missing `clearUserCache()`. Changed catch to `\Throwable`, added `$goal->fresh()`, uploaded current BaseAgent to server.

BUG-038: Pension Strategies Not Showing Retirement Age or Growth Period

Pension strategies didn't show which retirement age or years-to-retirement were used in calculations. Each strategy now shows age/years context. Default changed from 65 to 68. DOB-required guard added with amber UI state.
