

Fynla v0.9.2 Patch Notes

Released: 16 March 2026 **Previous version:** v0.9.0

Headline

Two major estate planning features in one release. Fynla now helps you **build a legally-structured UK will** with a guided 10-step wizard, and plan for incapacity with full **Lasting Power of Attorney** support — all directly within your estate plan.

What's New

Lasting Power of Attorney

A new **Power of Attorney** tab in Estate Planning gives you a dedicated space to manage one of the most important — and often overlooked — parts of your estate plan.

Why it matters: Without a Lasting Power of Attorney, if you lose mental capacity, your family must apply to the Court of Protection to manage your affairs. This costs over £1,000 per year, takes months to arrange, and a court may appoint someone you wouldn't have chosen. Fynla now makes it straightforward to get this in order.

Two types supported:

- **Property & Financial Affairs** — covers your bank accounts, investments, property, bills, and tax affairs. You choose whether your attorneys can act while you still have capacity or only when you've lost it.
 - **Health & Welfare** — covers medical treatment, care decisions, daily routine, and life-sustaining treatment. Can only be used when you lack capacity.
-

Guided Creation Wizard

A step-by-step wizard walks you through creating each Lasting Power of Attorney:

1. **Donor details** — pre-filled from your Fynla profile
2. **Appoint attorneys** — add one or more people to act on your behalf
3. **Replacement attorneys** — optional backups if primary attorneys can no longer serve
4. **Decision type** — choose how multiple attorneys make decisions (jointly, jointly and severally, or a combination)
5. **When attorneys can act** — Property & Financial only: while you have capacity or only when lost
6. **Preferences and instructions** — advisory wishes and binding instructions, plus life-sustaining treatment decisions for Health & Welfare
7. **Certificate provider** — the person who confirms you understand and aren't under pressure
8. **People to notify** — up to 5 people who can raise objections during registration
9. **Review** — full summary with compliance checks before completing

You can save as a draft at any point and return to finish later.

Compliance Checking

Every Lasting Power of Attorney is automatically checked against UK legal requirements under the Mental Capacity Act 2005:

- Donor must be 18 or older
- At least one primary attorney must be appointed
- Decision type required when appointing multiple attorneys
- Certificate provider must have known you for at least 2 years
- Maximum 5 people to notify
- When attorneys can act must be specified (Property & Financial)
- Life-sustaining treatment decision required (Health & Welfare)
- Registration status with the Office of the Public Guardian

Each check shows a clear pass, fail, or warning with an explanation of what needs attention.

Print and Save

View your completed Lasting Power of Attorney in a format that mirrors the official Office of the Public Guardian structure. Print directly from the browser or save as a PDF for your records.

Important: The printed document is a record of your details — to make your Lasting Power of Attorney legally valid, you must complete the official forms, sign with wet ink, and register with the Office of the Public Guardian (currently £82 per registration).

Upload Existing

Already have a Lasting Power of Attorney? Upload your existing document (PDF or image) and Fynla will track it alongside any new ones you create. Mark it as registered and add your Office of the Public Guardian reference number to keep everything in one place.

Registration Tracking

Once you've registered your Lasting Power of Attorney with the Office of the Public Guardian, mark it as registered in Fynla with your reference number. Your estate planning readiness checks will update automatically to reflect the registration.

Will Builder

A new **Will Builder** in Estate Planning lets you create a legally-structured will for England and Wales without leaving Fynla. A 10-step guided wizard walks you through everything needed for a valid UK will.

Why it matters: Around 60% of UK adults don't have a will. Without one, your estate is distributed under intestacy rules — which may not reflect your wishes, can delay access to funds for your family, and may

result in a larger Inheritance Tax bill. Fynla now makes it straightforward to get a will in place.

Guided wizard steps:

1. **Introduction** — legal disclaimer, domicile confirmation (England and Wales only), will type selection
2. **Personal details** — pre-filled from your Fynla profile (name, address, date of birth, occupation)
3. **Executors** — appoint a primary and backup executor with contact details and guidance on the role
4. **Guardians** — only shown if you have children under 18; appoint who should care for them
5. **Specific gifts** — leave cash amounts or named items to particular people (optional)
6. **Residuary estate** — distribute the remainder of your estate by percentage, with substitutional beneficiaries if someone predeceases you
7. **Funeral wishes** — burial, cremation, or no preference, plus free-text wishes (optional)
8. **Digital assets** — appoint a digital executor and record how to access your online accounts (optional)
9. **Review** — full will document preview in formal legal language, validation warnings, and print/save as PDF
10. **Signing guide** — step-by-step instructions for making your will legally valid with two witnesses

Mirror wills for couples: If you have a spouse, you can create a **mirror will** — two matching wills where each of you leaves everything to the other first, then to your chosen beneficiaries. One wizard run creates both wills with the beneficiaries automatically swapped.

Pre-population: The wizard automatically fills in your name, address, date of birth, occupation, spouse details, children, and existing executor from your Fynla profile. You only need to add new information.

Document format: Your generated will uses formal legal language ("I HEREBY REVOKE", "I GIVE DEVISE AND BEQUEATH", "IN WITNESS WHEREOF") with a hybrid design — Fynla branding in the header with traditional legal formatting in the body (serif font, numbered clauses, uppercase headings). Print directly from the browser or save as PDF.

Important: The will builder generates a structured will document — it does not provide legal advice. Your will is only legally valid once properly signed and witnessed in accordance with the Wills Act 1837. For complex estates, we recommend having your will reviewed by a qualified solicitor.

Improvements

Sidebar Navigation

A new **Power of Attorney** item has been added to the sidebar under the Family section, giving you one-click access to your Lasting Powers of Attorney from anywhere in the application. The **Will** sidebar item now links directly to the Will Builder at </estate/will-builder>. The sidebar highlights correctly whether you're viewing the Power of Attorney page, Will Builder, or creating a new Lasting Power of Attorney in the wizard.

Estate Planning Readiness

The estate planning data readiness assessment now checks for Lasting Powers of Attorney as a recommended item. If you haven't created one, you'll see a clear prompt explaining why it matters and linking to the new Power of Attorney tab.

This check has been upgraded from informational to a warning — recognising that lacking a Lasting Power of Attorney is a significant gap in any estate plan.

Version Page

The version information page now reflects v0.9.2 with the Lasting Power of Attorney feature details and release statistics.

Preview Personas

Three preview personas now include Lasting Power of Attorney data for demonstration:

Persona	Lasting Power of Attorney Details
David & Sarah Mitchell (Peak Earners)	Both types registered with the Office of the Public Guardian, multiple attorneys acting jointly and severally
Margaret Thompson (Widow)	Property & Financial registered, Health & Welfare in draft
Patricia & Harold Bennett (Retired Couple)	Both types registered for both spouses, with replacement attorneys

Technical Summary

Metric	Lasting Power of Attorney	Will Builder	Total
New database tables	3	1 (+1 altered)	4
New API endpoints	9	9	18
New backend files	14	6	20
New frontend components	16	13	29
Modified files	12	6	18
New tests	38 (93 assertions)	36 (91 assertions)	74 (184 assertions)

Fyn Assistant Optimisation

A comprehensive overhaul of the Fynla AI assistant (Fyn) based on a full audit against Anthropic's 2026 best practices. 21 improvements implemented across streaming, prompt quality, safety, and cost efficiency.

Real-Time Streaming

Fyn's responses now stream word-by-word in real time. Previously, the entire response was generated server-side before anything appeared — meaning you'd wait 10–30 seconds seeing nothing. Now the first words appear within a second, and you can watch the response form naturally.

A new **Stop generating** button lets you cancel a response mid-stream if you've already seen what you need.

Smarter Prompt Architecture

The system prompt that guides Fyn has been completely restructured:

- **XML-tagged sections** for clearer instruction following — identity, rules, compliance, context, examples, and personality are now cleanly separated
- **5 few-shot examples** demonstrating the ideal tone, format, and depth for protection, savings, tax, goal creation, and financial overview conversations
- **Richer financial context** — Fyn now sees your total savings, investments, pension value, protection cover, property ownership, estimated tax band, and retirement income gap in every conversation
- **Warm personality guidelines** — Fyn celebrates your progress before discussing gaps, uses plain language, and treats financial decisions with empathy
- **Response format rules** — concise, bold key figures, always ends with a follow-up question, no filler preambles

Regulatory Compliance

A dedicated 6-rule compliance framework ensures Fyn:

1. Uses hedging language for all guidance ("you may want to consider", not "you should")
2. Never recommends specific financial products or providers
3. Signposts regulated advice for complex decisions (pension transfers, estate structures)
4. Includes risk warnings when discussing investments
5. Caveats all tax guidance with current tax year and individual circumstances
6. Never gives market timing advice

Safety & Data Integrity

- **Input validation** on every record Fyn creates — currency amounts, dates, percentages, and enums are all validated before saving to the database
- **Duplicate detection** for savings accounts, investment accounts, pensions, and protection policies — Fyn warns you if a similar record already exists
- **Out-of-scope handling** — asking Fyn about the weather or football redirects politely to financial planning
- **Structured error messages** — specific, actionable messages for rate limits, busy service, long conversations, and configuration issues (replacing generic "something went wrong")
- **Daily token budgets** per subscription plan (Student: 50k, Standard: 200k, Pro: 500k tokens/day)

Tool Definitions

All 17 AI tools now use **strict schema validation** — guaranteeing that every tool call from the model has the correct types and required fields. Date fields use ISO format validation. Three previously underspecified tools (what-if scenarios, recommendations, financial plan) now have proper schemas.

Cost Efficiency

- **Prompt caching** reduces input token costs by up to 70% across multi-turn conversations — the system prompt and tool definitions are cached for 5 minutes between messages
- **Financial summary caching** avoids re-running the full 7-module analysis on every message (2-minute cache per user)
- **Model tiering** for Pro users — complex queries (financial plans, what-if scenarios, estate planning, pension projections) automatically use a more capable model, while simple queries stay on the fast, cost-effective default

Max Token Increase

Response length limits increased from 2,048/4,096 to **4,096/8,192 tokens** (Standard/Pro), allowing Fyn to give properly detailed analysis without truncating mid-thought.

Technical Summary (Updated)

Metric	Lasting Power of Attorney	Will Builder	Fyn Assistant	Total
New database tables	3	1 (+1 altered)	0	4
New API endpoints	9	9	0	18
New backend files	14	6	0	20
New frontend components	16	13	0	29
Modified files	12	6	7	25
New tests	38 (93 assertions)	36 (91 assertions)	0	74 (184 assertions)

Estate Planning Navigation Fix

Power of Attorney — Standalone Page

The Power of Attorney feature has been moved from a tab on the Estate Planning dashboard to its own **standalone page** at </estate/power-of-attorney>. This matches the pattern used for other estate sub-features like the Will Builder and Trust management.

What changed:

- **Sidebar "Power of Attorney"** now links directly to </estate/power-of-attorney> instead of </estate?tab=power-of-attorney>
- The Power of Attorney tab has been removed from the Estate Dashboard's internal tab system
- A new **Power of Attorney card** has been added to the IHT Planning navigation grid alongside Will, Gifting, Life Policy, and Charitable Bequest — clicking it navigates to the standalone page
- The card shows LPA status (registered count, draft count, or "None")

Conditional Will Builder Banner

The "Build Your Will" banner on the Estate Dashboard now **only shows when the user has no will document**. Previously it showed unconditionally for all users — including those who had already completed the Will Builder. The dashboard now checks for an existing will document on load and hides the banner accordingly.

IHT Planning Navigation Cards

A new **Power of Attorney card** has been added to the IHT Planning page's top navigation grid. The card displays:

- Registration status (number of registered LPAs, drafts, or "None")
- Guidance text ("Appoint someone to act on your behalf" when no LPAs exist)
- Click navigates to </estate/power-of-attorney>

Updated Preview Persona Data

LPA seeding has been refined:

Persona	LPA Data
David & Sarah Mitchell (Peak Earners)	4 registered LPAs — David has Property & Financial (LP-2024-0847291) and Health & Welfare (LP-2024-0847292), Sarah has Property & Financial (LP-2024-0953104) and Health & Welfare (LP-2024-0953105). Each with 2 attorneys (spouse + sibling) acting jointly and severally, 1 notification person
Margaret Thompson (Widow)	Property & Financial registered (LP-2023-0612845) with son as primary attorney and daughter as replacement. Health & Welfare in draft with same attorney arrangement

Lasting Power of Attorney Legal Document View

Clicking "View Details" on any Lasting Power of Attorney now displays the full legal document in Office of the Public Guardian format, replacing the previous card-based layout. The document includes:

- **Formal legal sections** — Donor, Attorneys, Replacement Attorneys, When Attorneys Can Act, Preferences & Instructions, Life-Sustaining Treatment, Certificate Provider, People to Notify
- **Signatures** — donor, each attorney, replacement attorneys, and certificate provider, rendered in cursive script with dates for signed documents
- **Registration stamp** — bordered section showing Office of the Public Guardian registration date and reference number for registered LPAs
- **Print / Save PDF** — opens a formatted print window with the full legal document
- **Back navigation** — uses the standard [detail-inline-back](#) pattern at the top of the view

The LPA dashboard page no longer shows a "Back to Estate Planning" link — it is a standalone page accessible from the sidebar.

Will Navigation Consolidation

All will-related navigation now points to the Will Builder at </estate/will-builder>:

- **Sidebar "Will"** — previously linked to </valuable-info?section=will>, now links to </estate/will-builder>
- **IHT Planning Will card** — now navigates to </estate/will-builder>
- **Navbar dropdown** — Will link removed (Will Builder is accessed via sidebar)
- **Dashboard cards** (Areas to Complete, Areas to Consider) — now link to </estate/will-builder>
- **Valuable Info page** — Will tab removed entirely; remaining tabs: Letter, Income, Expenditure, Risk Profile

Files Changed

File	Change
resources/js/views/Estate/EstateDashboard.vue	Removed LPA tab, conditional will banner
resources/js/views/Estate/PowerOfAttorneyView.vue	NEW — standalone LPA page
resources/js/utils/lpaDocumentRenderer.js	NEW — legal document renderer + print for LPAs
resources/js/components/Estate/LpaDetailView.vue	Replaced card layout with legal document format, detail-inline-back navigation
resources/js/components/Estate/PowerOfAttorneyTab.vue	Simplified layout — removed outer type wrapper cards
resources/js/router/index.js	Added /estate/power-of-attorney + preview route
resources/js/components/SideMenu.vue	Will links to /estate/will-builder , LPA links to /estate/power-of-attorney , updated active states
resources/js/components/Estate/IHTPlanning.vue	Added Power of Attorney card, Will card links to Will Builder
resources/js/components/Navbar.vue	Removed Will link from dropdown
resources/js/views/ValuableInfo.vue	Removed Will tab

File	Change
<code>resources/js/components/Dashboard/AreasToCompleteCard.vue</code>	Will link updated to <code>/estate/will-builder</code>
<code>resources/js/components/Dashboard/AreasToConsiderCard.vue</code>	Will link updated to <code>/estate/will-builder</code>
<code>database/seeder/PreviewUserSeeder.php</code>	LPA + WillDocument seeding with signatures and witness data

Backend Fixes

Savings Plan Integration

The savings module was missing from the Plans system. Requesting `/api/plans/savings` returned a 404, and the Actions Dashboard skipped savings entirely. The `SavingsPlanService` has now been wired into `PlanController` — savings plan generation, what-if recalculation, and plan readiness status all work correctly.

Dashboard Real Data

The main dashboard previously showed identical hardcoded values for every user. All five module summaries, health scores, and alerts now come from the actual module agents:

- **Protection:** real adequacy score, coverage totals, premium costs, gap count
- **Savings:** real total savings, emergency fund runway, ISA usage percentage
- **Investment:** real portfolio value, year-to-date return, holdings count, rebalancing status
- **Retirement:** real projected income, target income, income gap, years to retirement
- **Estate:** real net worth, Inheritance Tax liability, effective tax rate

Each agent call is wrapped in error handling so a single module failure doesn't break the entire dashboard.

Savings Rate Expiry Alerts

The `savings:send-alerts` command referenced a `rate_valid_until` column that didn't exist. A migration now adds this nullable date column to `savings_accounts`, enabling rate expiry alerts at 90, 30, and 7 days before a promotional or fixed rate expires.

Retired Couple Analysis

The retired couple persona (Patricia & Harold Bennett) showed zero retirement income because the readiness check blocked analysis when no employment income was recorded. For already-retired users, the income check is now a warning rather than a blocker — pension income is used for analysis instead. Patricia now correctly shows £18,500 (Defined Benefit) + £11,500 (State Pension) = £30,000 projected annual retirement income.

Dashboard Enhancements

Module Action Cards

The main dashboard now includes **Protection**, **Cash & Savings**, and **Investment** cards alongside the existing Net Worth, Estate, and Retirement cards. Each card shows key metrics and up to 2 top-priority recommended actions from the Fynla Brain, giving you immediate visibility of what to do next.

- **Protection** — total coverage, monthly premiums, policy count, plus actions like coverage gaps or missing income protection
- **Cash & Savings** — total savings balance, account count, plus actions like emergency fund targets or ISA optimisation
- **Investments** — portfolio value, account count, plus actions like fee reviews or rebalancing opportunities
- **Estate Planning** — trusts section replaced with estate actions like charitable bequest opportunities or liquidity risk alerts
- **Retirement** — now includes actions like salary sacrifice opportunities or pension contribution optimisation

When a module has no recommended actions, the card shows a list of your accounts or policies instead — so there's no empty white space.

Docked Fyn Assistant

For logged-in users on desktop, the Fyn AI assistant now appears as a permanent panel on the right side of the dashboard. The side menu auto-collapses to make room. The floating chat button is hidden when the docked panel is active. Preview personas and mobile users continue to use the floating chat as before.

Coming Soon

- Fyn Assistant conversation analytics dashboard

Fynla is a financial planning tool, not a legal service. We recommend seeking professional legal advice when creating your will or Lasting Power of Attorney. A will must be properly signed and witnessed to be legally valid. Registration with the Office of the Public Guardian is required to make a Lasting Power of Attorney legally valid.
