

# Fynla Email Notification Reference

---

Last updated: 16 April 2026 Branch: *awinPlusDev* (live) + *lifecycle-email-engine* (PR #212, not yet deployed)

All emails sent from *noreply@fynla.org* ("Fynla") unless noted.

---

## 1. Scheduled Emails (Cron)

Emails sent automatically by Laravel's scheduler (*app/Console/Kernel.php*). Production cron runs *php artisan schedule:run* every minute.

### 1a. Trial Expiration Reminders

|                      |                                                                        |
|----------------------|------------------------------------------------------------------------|
| <b>Command</b>       | <i>trials:send-reminders</i>                                           |
| <b>Schedule</b>      | Daily at 09:00                                                         |
| <b>Recipients</b>    | Trial users with <i>trial_ends_at</i> 3, 2, or 1 day(s) away           |
| <b>Frequency</b>     | Up to 3 emails per user (one per day at each threshold)                |
| <b>Deduplication</b> | <i>trial_reminder_log</i> table (per user, per day-count)              |
| <b>Mailable</b>      | <i>App\Mail\TrialExpirationReminder</i>                                |
| <b>Template</b>      | <i>resources/views/emails/trial-expiration-reminder.blade.php</i>      |
| <b>Subject</b>       | "Your Fynla trial ends in {N} days" / "Your Fynla trial ends tomorrow" |
| <b>Command class</b> | <i>app/Console/Commands/SendTrialReminderEmails.php</i>                |

### 1b. Subscription Renewal Reminders

|                      |                                                                               |
|----------------------|-------------------------------------------------------------------------------|
| <b>Command</b>       | <i>subscriptions:send-renewal-reminders</i>                                   |
| <b>Schedule</b>      | Daily at 09:00                                                                |
| <b>Recipients</b>    | Active subscribers where <i>current_period_end</i> is exactly 7 days from now |
| <b>Frequency</b>     | 1 email per subscription per renewal period                                   |
| <b>Deduplication</b> | <i>renewal_reminder_log</i> table (per subscription, per period)              |
| <b>Mailable</b>      | <i>App\Mail\SubscriptionRenewalReminder</i>                                   |
| <b>Template</b>      | <i>resources/views/emails/subscription-renewal-reminder.blade.php</i>         |
| <b>Subject</b>       | "Your Fynla subscription renews in 7 days"                                    |
| <b>Command class</b> | <i>app/Console/Commands/SendRenewalReminderEmails.php</i>                     |

## 1c. Data Retention Warnings

|                      |                                                                                                             |
|----------------------|-------------------------------------------------------------------------------------------------------------|
| <b>Command</b>       | <code>data-retention:send-warnings</code>                                                                   |
| <b>Schedule</b>      | Daily at 09:00                                                                                              |
| <b>Recipients</b>    | Users with expired subscriptions in the 30-day grace period<br>( <code>data_retention_starts_at</code> set) |
| <b>Frequency</b>     | Up to 12 emails over 30 days per user                                                                       |
| <b>Deduplication</b> | <code>data_retention_email_log</code> table (per subscription, per day-number)                              |
| <b>Mailable</b>      | <code>App\Mail\DataRetentionWarning</code>                                                                  |
| <b>Template</b>      | <code>resources/views/emails/data-retention-warning.blade.php</code>                                        |
| <b>Command class</b> | <code>app/Console/Commands/SendDataRetentionWarnings.php</code>                                             |

### Email days and subjects:

| Day | Days Remaining | Subject                                                                   |
|-----|----------------|---------------------------------------------------------------------------|
| 1   | 30             | "Your Fynla access has ended - your data will be deleted in 30 days"      |
| 15  | 15             | "15 days until your Fynla data is permanently deleted"                    |
| 20  | 10             | "10 days left - your Fynla data will be permanently deleted"              |
| 21  | 9              | "9 days left - your Fynla data will be permanently deleted"               |
| 22  | 8              | "8 days left - ..."                                                       |
| 23  | 7              | "7 days left - ..."                                                       |
| 24  | 6              | "6 days left - ..."                                                       |
| 25  | 5              | "5 days left - ..."                                                       |
| 26  | 4              | "4 days left - ..."                                                       |
| 27  | 3              | "3 days left - ..."                                                       |
| 28  | 2              | "2 days left - ..."                                                       |
| 29  | 1              | "1 day left - FINAL WARNING: your Fynla data will be permanently deleted" |

## 2. Lifecycle Email Engine (PR #212 - NOT YET DEPLOYED)

Branch: `lifecycle-email-engine`. 5 campaigns, 84 tests passing, E2E verified 14 April 2026. Awaiting conflict resolution in `trial-expiration-reminder.blade.php` before merge.

|                |                                  |
|----------------|----------------------------------|
| <b>Command</b> | <code>lifecycle:run-daily</code> |
|----------------|----------------------------------|

|                      |                                                                                        |
|----------------------|----------------------------------------------------------------------------------------|
| <b>Schedule</b>      | Daily at 08:30                                                                         |
| <b>Engine</b>        | <code>App\Services\Lifecycle\LifecycleEngine</code>                                    |
| <b>Kill switch</b>   | <code>config('lifecycle.enabled')</code> - can be disabled without deploy              |
| <b>Deduplication</b> | <code>lifecycle_email_log</code> table (per user, per campaign)                        |
| <b>User opt-out</b>  | Per-campaign toggle in <code>notification_preferences</code> table                     |
| <b>Magic links</b>   | Signed URLs, expire after 7 days (configurable)                                        |
| <b>Test commands</b> | <code>lifecycle:e2e-test --recipient=EMAIL</code> / <code>lifecycle:e2e-cleanup</code> |

### Campaign 1: Cancelled Trialer (priority 1)

|                       |                                                                                                                   |
|-----------------------|-------------------------------------------------------------------------------------------------------------------|
| <b>Target</b>         | Users who cancelled mid-trial ( <code>cancelled_at &lt; trial_ends_at</code> ), exactly 3 days after cancellation |
| <b>Opt-out field</b>  | <code>lifecycle_cancelled_trialer</code>                                                                          |
| <b>Mailable</b>       | <code>App\Mail\Lifecycle\CancelledTrialerMail</code>                                                              |
| <b>Template</b>       | <code>resources/views/emails/lifecycle/cancelled-trialer.blade.php</code>                                         |
| <b>Subject</b>        | "Sorry to see you go - what could we have done better?"                                                           |
| <b>Action</b>         | Feedback quick-pick buttons (reason codes) + optional free-text                                                   |
| <b>Campaign class</b> | <code>app/Services/Lifecycle/Campaigns/CancelledTrialerCampaign.php</code>                                        |

### Campaign 2: Churned Subscriber (priority 2)

|                       |                                                                                                                            |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------|
| <b>Target</b>         | Users who cancelled after trial ended ( <code>cancelled_at &gt;= trial_ends_at</code> ), exactly 3 days after cancellation |
| <b>Opt-out field</b>  | <code>lifecycle_churned_subscriber</code>                                                                                  |
| <b>Mailable</b>       | <code>App\Mail\Lifecycle\ChurnedSubscriberMail</code>                                                                      |
| <b>Template</b>       | <code>resources/views/emails/lifecycle/churned-subscriber.blade.php</code>                                                 |
| <b>Subject</b>        | "Thank you for being a Fynla subscriber - we'd love your feedback"                                                         |
| <b>Action</b>         | Feedback quick-pick buttons + optional free-text. Includes subscription duration context                                   |
| <b>Campaign class</b> | <code>app/Services/Lifecycle/Campaigns/ChurnedSubscriberCampaign.php</code>                                                |

### Campaign 3: Lapsed Subscriber (priority 3)

|                       |                                                                                                                                         |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <b>Target</b>         | Users with <code>past_due</code> subscription where <code>current_period_end</code> is at least 5 days ago (after Revolut retry window) |
| <b>Opt-out field</b>  | <code>lifecycle_lapsed_subscriber</code>                                                                                                |
| <b>Mailable</b>       | <code>App\Mail\Lifecycle\LapsedSubscriberMail</code>                                                                                    |
| <b>Template</b>       | <code>resources/views/emails/lifecycle/lapsed-subscriber.blade.php</code>                                                               |
| <b>Subject</b>        | "Your Fynla payment didn't go through - let's get you back on track"                                                                    |
| <b>Action</b>         | Update payment link + feedback quick-pick buttons. Shows grace period end date                                                          |
| <b>Campaign class</b> | <code>app/Services/Lifecycle/Campaigns/LapsedSubscriberCampaign.php</code>                                                              |

#### Campaign 4: Empty Trialer (priority 4)

|                       |                                                                                           |
|-----------------------|-------------------------------------------------------------------------------------------|
| <b>Target</b>         | Users whose trial ended, no active/past_due subscription, AND no data in any module table |
| <b>Opt-out field</b>  | <code>lifecycle_empty_trialer</code>                                                      |
| <b>Mailable</b>       | <code>App\Mail\Lifecycle\EmptyTrialerMail</code>                                          |
| <b>Template</b>       | <code>resources/views/emails/lifecycle/empty-trialer.blade.php</code>                     |
| <b>Subject</b>        | "It's been a while - come back and try Fynla again"                                       |
| <b>Action</b>         | Restart trial link (grants fresh 14-day trial)                                            |
| <b>Campaign class</b> | <code>app/Services/Lifecycle/Campaigns/EmptyTrialerCampaign.php</code>                    |

#### Campaign 5: Engaged Trialer (priority 5)

|                      |                                                                                                                                               |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Target</b>        | Users whose trial ended, no active/past_due subscription, AND has data in at least one module table                                           |
| <b>Opt-out field</b> | <code>lifecycle_engaged_trialer</code>                                                                                                        |
| <b>Mailable</b>      | <code>App\Mail\Lifecycle\EngagedTrialerMail</code>                                                                                            |
| <b>Template</b>      | <code>resources/views/emails/lifecycle/engaged-trialer.blade.php</code>                                                                       |
| <b>Subject</b>       | "Your Fynla picture so far, {Name} - and 25-45% off to finish it"                                                                             |
| <b>Action</b>        | Magic link to login with auto-generated discount code pre-filled at checkout. Includes personalised data snapshot (modules used, key metrics) |
| <b>Discount</b>      | Auto-generated <code>lifecycle_welcome</code> code via <code>LifecycleDiscountCodeGenerator</code>                                            |

---

|                       |                                                                          |
|-----------------------|--------------------------------------------------------------------------|
| <b>Campaign class</b> | <code>app/Services/Lifecycle/Campaigns/EngagedTrialerCampaign.php</code> |
|-----------------------|--------------------------------------------------------------------------|

### 3. Webhook-Triggered Emails (Revolut Payment Events)

These fire immediately when Revolut sends a webhook to `/api/webhooks/revolut`.

#### 3a. Payment Confirmation

|                  |                                                                                                                                  |
|------------------|----------------------------------------------------------------------------------------------------------------------------------|
| <b>Trigger</b>   | Revolut <code>ORDER_COMPLETED</code> or <code>ORDER_AUTHORIZED</code> webhook / <code>PaymentController::confirmPayment()</code> |
| <b>Recipient</b> | The user who made the payment                                                                                                    |
| <b>Mailable</b>  | <code>App\Mail\PaymentConfirmation</code>                                                                                        |
| <b>Template</b>  | <code>resources/views/emails/payment-confirmation.blade.php</code>                                                               |
| <b>Subject</b>   | "Payment confirmation - Fynla"                                                                                                   |
| <b>Content</b>   | Plan name, billing cycle, amount paid, discount details (if any), next renewal date, auto-renew status                           |
| <b>Sent from</b> | <code>WebhookController::handleOrderCompleted()</code> and <code>PaymentController::confirmPayment()</code>                      |

#### 3b. Payment Failed

|                  |                                                                      |
|------------------|----------------------------------------------------------------------|
| <b>Trigger</b>   | Revolut <code>SUBSCRIPTION_OVERDUE</code> webhook                    |
| <b>Recipient</b> | The user whose payment failed                                        |
| <b>Mailable</b>  | <code>App\Mail\PaymentFailedNotification</code>                      |
| <b>Template</b>  | <code>resources/views/emails/payment-failed.blade.php</code>         |
| <b>Subject</b>   | "Action required - payment issue with your Fynla subscription"       |
| <b>Content</b>   | Plan name, amount due, period end date                               |
| <b>Sent from</b> | <code>SubscriptionRenewalService::handleSubscriptionOverdue()</code> |

#### 3c. Invoice

|                  |                                                       |
|------------------|-------------------------------------------------------|
| <b>Trigger</b>   | Successful renewal payment (after webhook processing) |
| <b>Recipient</b> | The subscriber                                        |
| <b>Mailable</b>  | <code>App\Mail\InvoiceEmail</code>                    |
| <b>Template</b>  | <code>resources/views/emails/invoice.blade.php</code> |

|                   |                                                                                                                            |
|-------------------|----------------------------------------------------------------------------------------------------------------------------|
| <b>Subject</b>    | "Your Fynla invoice - {invoice_number}"                                                                                    |
| <b>Content</b>    | Plan name, billing cycle, amount, period dates, next renewal, discount details                                             |
| <b>Attachment</b> | Invoice PDF (if generated and stored)                                                                                      |
| <b>Sent from</b>  | <code>InvoiceService::emailInvoice()</code> called from<br><code>SubscriptionRenewalService::handleRenewalPayment()</code> |

## 4. User-Action-Triggered Emails

These are sent in direct response to a user action, not on a schedule.

### 4a. Email Verification Code

|                  |                                                                                           |
|------------------|-------------------------------------------------------------------------------------------|
| <b>Trigger</b>   | User registers or logs in without verified email                                          |
| <b>Recipient</b> | The user                                                                                  |
| <b>Mailable</b>  | <code>App\Mail\VerificationCode</code>                                                    |
| <b>Template</b>  | <code>resources/views/emails/verification-code.blade.php</code>                           |
| <b>Subject</b>   | "Your Fynla Verification Code"                                                            |
| <b>Content</b>   | 6-digit verification code, context-aware label ("complete your registration" or "log in") |

### 4b. Password Reset Code

|                  |                                                                   |
|------------------|-------------------------------------------------------------------|
| <b>Trigger</b>   | User requests password reset                                      |
| <b>Recipient</b> | The user                                                          |
| <b>Mailable</b>  | <code>App\Mail&gt;PasswordResetCode</code>                        |
| <b>Template</b>  | <code>resources/views/emails/password-reset-code.blade.php</code> |
| <b>Subject</b>   | "Reset Your Fynla Password"                                       |
| <b>Content</b>   | 6-digit reset code                                                |

### 4c. Account Deletion Verification Code

|                  |                                                                          |
|------------------|--------------------------------------------------------------------------|
| <b>Trigger</b>   | User initiates account deletion                                          |
| <b>Recipient</b> | The user                                                                 |
| <b>Mailable</b>  | <code>App\Mail\DeletionVerificationCode</code>                           |
| <b>Template</b>  | <code>resources/views/emails/deletion-verification-code.blade.php</code> |
| <b>Subject</b>   | "Account Deletion Verification Code"                                     |

|                |                           |
|----------------|---------------------------|
| <b>Content</b> | 6-digit verification code |
|----------------|---------------------------|

#### 4d. Data Deletion Confirmation

|                  |                                                                          |
|------------------|--------------------------------------------------------------------------|
| <b>Trigger</b>   | Account/data permanently deleted                                         |
| <b>Recipient</b> | The user's email (sent after deletion)                                   |
| <b>Mailable</b>  | <code>App\Mail\DataDeletionConfirmation</code>                           |
| <b>Template</b>  | <code>resources/views/emails/data-deletion-confirmation.blade.php</code> |
| <b>Subject</b>   | "Your Fynla data has been permanently deleted"                           |

#### 4e. Spouse Account Created

|                  |                                                                      |
|------------------|----------------------------------------------------------------------|
| <b>Trigger</b>   | Primary user creates a spouse account                                |
| <b>Recipient</b> | The new spouse                                                       |
| <b>Mailable</b>  | <code>App\Mail\SpouseAccountCreated</code>                           |
| <b>Template</b>  | <code>resources/views/emails/spouse-account-created.blade.php</code> |
| <b>Subject</b>   | "Your Fynla Account Has Been Created"                                |
| <b>Content</b>   | Created-by name, temporary password                                  |

#### 4f. Spouse Account Linked

|                  |                                                                     |
|------------------|---------------------------------------------------------------------|
| <b>Trigger</b>   | Spouse account linked to primary                                    |
| <b>Recipient</b> | The spouse                                                          |
| <b>Mailable</b>  | <code>App\Mail\SpouseAccountLinked</code>                           |
| <b>Template</b>  | <code>resources/views/emails/spouse-account-linked.blade.php</code> |
| <b>Subject</b>   | "Your Fynla Account Has Been Linked"                                |

#### 4g. Spouse Data Sharing Request

|                     |                                                                                                |
|---------------------|------------------------------------------------------------------------------------------------|
| <b>Trigger</b>      | User requests permission to view spouse's data                                                 |
| <b>Recipient</b>    | The spouse being asked                                                                         |
| <b>Notification</b> | <code>App\Notifications\SpousePermissionRequest</code> (via <code>mail</code> channel, queued) |
| <b>Subject</b>      | "Spouse Data Sharing Request"                                                                  |
| <b>Sent from</b>    | <code>SpousePermissionController::request()</code>                                             |

#### 4h. Subscription Cancellation

|                  |                                                                         |
|------------------|-------------------------------------------------------------------------|
| <b>Trigger</b>   | User cancels their subscription                                         |
| <b>Recipient</b> | The user                                                                |
| <b>Mailable</b>  | <code>App\Mail\SubscriptionCancellation</code>                          |
| <b>Template</b>  | <code>resources/views/emails/subscription-cancellation.blade.php</code> |
| <b>Subject</b>   | "Subscription cancelled - Fynla"                                        |
| <b>Content</b>   | Plan name, billing cycle, access-until date                             |
| <b>Sent from</b> | <code>PaymentController::cancelSubscription()</code>                    |

#### 4i. Referral Invitation

|                  |                                                                             |
|------------------|-----------------------------------------------------------------------------|
| <b>Trigger</b>   | User sends a referral invite                                                |
| <b>Recipient</b> | The friend being invited                                                    |
| <b>Mailable</b>  | <code>App\Mail\ReferralInvitationEmail</code>                               |
| <b>Template</b>  | <code>resources/views/emails/referral-invitation.blade.php</code>           |
| <b>Subject</b>   | "{Name} thinks you'd like Fynla"                                            |
| <b>Content</b>   | Referrer name, referral code, registration link with <code>?ref=CODE</code> |

#### 4j. Bug Report (Internal)

|                  |                                                                       |
|------------------|-----------------------------------------------------------------------|
| <b>Trigger</b>   | User submits a bug report                                             |
| <b>Recipient</b> | Internal support team (not users)                                     |
| <b>Mailable</b>  | <code>App\Mail\BugReportMail</code>                                   |
| <b>Template</b>  | <code>resources/views/emails/bug-report.blade.php</code>              |
| <b>Subject</b>   | "Bug Report - User {userId}" (with [PREVIEW] badge for preview users) |

### 5. Scheduled Notifications (NOT Email)

These are scheduled commands that create push or database notifications only. No emails are sent.

| Time  | Command                                  | Channel | Notification Type               |
|-------|------------------------------------------|---------|---------------------------------|
| 00:05 | <code>trials:expire</code>               | None    | Expires trials, no notification |
| 01:00 | <code>subscriptions:check-overdue</code> | None    | Status check only               |

| Time  | Command                            | Channel  | Notification Type                                                                                                                                                                                                            |
|-------|------------------------------------|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 08:00 | notifications:daily-insight        | Push     | DailyInsightNotification                                                                                                                                                                                                     |
| 09:00 | notifications:policy-renewals      | Push     | PolicyRenewalNotification — 30 days before policy renewal                                                                                                                                                                    |
| 09:15 | protection:send-alerts             | Database | ProtectionAlertNotification — expired policies, approaching renewals (24/12/3 months), annual review                                                                                                                         |
| 09:30 | notifications:mortgage-rate-alerts | Push     | MortgageRateAlertNotification — 90/60/30 days before fixed rate ends                                                                                                                                                         |
| 10:00 | savings:send-alerts                | Database | SavingsMaturityAlertNotification (90/30/7 days), SavingsRateExpiryNotification (90/30/7 days), ISAAllowanceWarningNotification (90 days before tax year end), EmergencyFundAlertNotification (savings < 1 month expenditure) |
| 10:30 | estate:send-alerts                 | Database | GiftExemptionNotification (at 6yr/6.5yr/6yr11mo), TrustAnniversaryNotification (90 days before 10-year charge), Annual IHT review (first 30 days of tax year)                                                                |

6. Full Daily Timeline

Complete chronological view of all scheduled automated activity (emails + notifications).

| Time        | Type   | Action                                                                   |
|-------------|--------|--------------------------------------------------------------------------|
| 00:05       | System | trials:expire — expire ended trials                                      |
| 00:30       | System | data-retention:purge-expired — permanently delete data past 30-day grace |
| 01:00       | System | subscriptions:check-overdue — detect missed webhooks                     |
| 02:00       | System | sessions:cleanup — clean orphaned sessions                               |
| 03:00 (Sun) | System | audit:purge — purge old audit log entries                                |
| Hourly      | System | registrations:cleanup — remove stale pending registrations               |
| 08:00       | Push   | Daily insight notification                                               |
| 08:30       | Email  | Lifecycle engine: up to 5 campaigns (NOT YET DEPLOYED)                   |

| Time  | Type     | Action                                                                |
|-------|----------|-----------------------------------------------------------------------|
| 09:00 | Email    | Trial expiration reminders (3/2/1 day warnings)                       |
| 09:00 | Email    | Subscription renewal reminders (7 days before)                        |
| 09:00 | Email    | Data retention warnings (Day 1, 15, 20-29)                            |
| 09:00 | Push     | Policy renewal reminders (30 days before)                             |
| 09:15 | Database | Protection alerts (expiry, renewal, annual review)                    |
| 09:30 | Push     | Mortgage rate alerts (90/60/30 days before)                           |
| 10:00 | Database | Savings alerts (maturity, rate expiry, ISA allowance, emergency fund) |
| 10:30 | Database | Estate alerts (gift exemption, trust anniversary, annual IHT review)  |

7. Summary Counts

| Category                                  | Count                        | Status                 |
|-------------------------------------------|------------------------------|------------------------|
| Scheduled email commands                  | 3                            | Live                   |
| Lifecycle email campaigns                 | 5                            | PR #212 (not deployed) |
| Webhook-triggered emails                  | 3                            | Live                   |
| User-action emails                        | 9                            | Live                   |
| Internal emails (bug report)              | 1                            | Live                   |
| Total email types                         | 21                           | 16 live, 5 pending     |
| Scheduled push notifications              | 4                            | Live                   |
| Scheduled database notifications          | 3 commands (9+ alert types)  | Live                   |
| Mailable classes (app/Mail/)              | 15 (+ 5 on lifecycle branch) |                        |
| Notification classes (app/Notifications/) | 15                           |                        |
| Blade templates (resources/views/emails/) | 15 (+ 6 on lifecycle branch) |                        |
