BUG DESCRIPTION

In the retirement section if I make the page smaller - the box on the right hand side - general assets - gets cut off half way across the box

TECHNICAL CONTEXT

BUG DESCRIPTION

I selected the protecting and growing whilst going through the onboarding and clicked straight to dashboard (or timed out). Once I got to my dashboard and clicked continue journey or start journey, it took me to the starting out journey, not protecting and growing

EXPECTED BEHAVIOUR

Should have taken me back to protecting and growing Also having start a new journey should only appear in both the header and main section of the dashboard if they skip selectling a journey after registration. If they select a journey, both buttons should say continue journey. There should also be link on the first page when pressing continue journey to change journey (which is available in screen prior)

TECHNICAL CONTEXT

BUG DESCRIPTION

Pension Retirement Age Defaults to 67 Where: Onboarding Step 5 > Retirement > Add Pension Issue: When adding a DC pension, the "Planned Retirement Age" field defaults to 67. For a user who has already entered a planned retirement age of 60 in the About You step, this creates an inconsistency. The pension form should auto-populate with the user's stated retirement age.

BUG DESCRIPTION

Number Input Scroll Interference Where: Any number input field during onboarding Issue: When scrolling the page while the cursor is over a number input field, the scroll

action changes the field value instead of scrolling the page. This can silently corrupt data if users don't notice
